[Company Address]

Dear [Hiring Manager Name],

I am writing to express my interest in the [Job Title] position at [Company Name], as recommended to me by [Referrer Name], who currently serves as [Referrer's Position] within your organization. Having followed [Company Name]'s advancements in [specific industry or technology], I am eager to contribute my technical expertise in data architecture and pipeline optimization to your engineering team.

In my current role at [Current/Previous Company], I have focused on building scalable ETL/ELT processes and maintaining robust data warehouses. My experience with [Tool/Language 1, e.g., Python/PySpark], [Tool/Language 2, e.g., SQL/Snowflake], and [Cloud Platform, e.g., AWS/Azure] has allowed me to reduce data latency by [Percentage]% and improve overall system reliability. I specialize in transforming complex raw data into actionable insights while ensuring high data integrity and security standards.

[Referrer Name] mentioned your team is currently tackling challenges related to [mention a specific project or technology the referrer told you about]. With my background in [specific skill, e.g., stream processing or data modeling], I am confident I can provide immediate value to these initiatives and support [Company Name]'s data-driven objectives.

I have attached my resume for your review and would appreciate the opportunity to discuss how my technical background aligns with the goals of the [Department Name] team. Thank you for your time and consideration.

Sincerely,

[Your Full Name]
