[Hiring Manager Name]
[Title]
[Company Name]

Dear [Hiring Manager Name],

I am writing to express my interest in the **DevOps Engineering Consultant** position at [Company Name]. I was recently speaking with **[Referral Name]**, who currently serves as [Referral's Title] at your organization, and they suggested I reach out regarding this role based on my background in cloud architecture and infrastructure automation.

With [Number] years of experience in DevOps and Site Reliability Engineering, I have specialized in helping organizations scale their delivery pipelines and transition to cloud-native environments. My recent consulting projects have focused on:

- Architecting and maintaining CI/CD workflows using **[Tools: e.g., Jenkins, GitHub Actions, GitLab CI]**.
- Implementing Infrastructure as Code (IaC) via **[Tools: e.g., Terraform, CloudFormation, Pulumi]** to ensure reproducible environments.
- Managing container orchestration with **[Tools: e.g., Kubernetes, Docker Swarm]** across **[Cloud Providers: e.g., AWS, Azure, GCP]**.
- Optimizing system monitoring and observability through **[Tools: e.g., Prometheus, Grafana, Datadog]**.

I am particularly drawn to [Company Name] because of your recent initiatives in [specific company project or industry challenge]. I believe my consultative approach-balancing technical debt reduction with the need for rapid feature deployment-aligns perfectly with your current engineering goals.

I have attached my resume for your review and would appreciate the opportunity to discuss how my expertise can support your team's DevOps maturity. Thank you for your time and consideration.

Best regards,

[Your Name]
