Dear [Hiring Manager Name],

I am writing to express my strong interest in the **[Job Title]** position at **[Company Name]**. As a Software Engineer specializing in backend development with **[Number]** years of experience building scalable, distributed systems using Java, I am confident in my ability to contribute effectively to your engineering team.

In my current role at **[Current/Previous Company]**, I have focused on designing and implementing robust microservices using the Spring Boot ecosystem. One of my key achievements involved **[describe a specific technical achievement, e.g., optimizing database queries to reduce latency by X% or architecting a message-driven system using Kafka]**. I am deeply familiar with JVM internals, RESTful API design, and modern DevOps practices including CI/CD and containerization with Docker and Kubernetes.

What attracts me to **[Company Name]** is your commitment to **[mention a specific company value, project, or technology stack mentioned in the job post]**. I am eager to apply my expertise in multi-threading, Hibernate, and **[SQL/NoSQL]** databases to help your team solve complex architectural challenges and deliver high-quality, maintainable code.

I have enclosed my resume, which provides more detail on my technical background and project history. Thank you for your time and consideration. I look forward to the possibility of discussing how my backend engineering skills can support **[Company Name]**'s objectives.

Sincerely,

[Your Full Name]
