[Company Name]

[Company Address]

Dear [Hiring Manager Name/Engineering Lead],

I am writing to express my interest in the [Job Title] position at [Company Name]. As a Cloud Infrastructure Software Engineer with [Number] years of experience building and scaling [AWS/GCP/Azure] environments, I have followed [Company Name]'s work in [Specific Industry/Technology] and am eager to contribute to your platform's reliability and automation goals. In my current role at [Current/Previous Company], I focused on [mention a primary responsibility, e.g., developing Infrastructure as Code (IaC) modules or migrating monolithic services to Kubernetes]. One of my key achievements was [Action Taken], which resulted in [Quantifiable Result, e.g., a 40% reduction in deployment latency or \$50k monthly savings in cloud spend]. I am deeply proficient in [Tool 1, e.g., Terraform], [Tool 2, e.g., Go/Python], and [Tool 3, e.g., Docker/Kubernetes]. I am particularly drawn to this role at [Company Name] because of your commitment to [mention a company value or specific project, e.g., high-availability distributed systems]. My background in designing CI/CD pipelines and implementing observability stacks aligns with your need for [mention a requirement from the job description, e.g., robust SRE practices]. I would welcome the opportunity to discuss how my technical background in cloud-native architecture can support [Company Name]'s engineering roadmap. Thank you for your time and consideration.

Sincerely,

[Full Name]
