[Hiring Manager Name]

[Title]

[Company Name]

[Company Address]

Dear [Hiring Manager Name],

I am writing to express my interest in the **Cloud Infrastructure Engineer** position at [Company Name]. With [Number] years of experience architecting scalable environments and automating cloud lifecycles, I am eager to contribute to your engineering team's reliability and efficiency goals.

In my recent role at [Previous Company], I focused on migrating legacy monolithic services to a [AWS/Azure/GCP] microservices architecture. I implemented Infrastructure as Code (IaC) patterns that reduced deployment times by [X]% and improved system uptime to [99.XX]%. My approach centers on the "Well-Architected Framework," ensuring security, cost-optimization, and performance at scale.

Core Technical Competencies:

- **Cloud Platforms:** [e.g., AWS (EC2, EKS, RDS), Azure, GCP]
- **Infrastructure as Code:** [e.g., Terraform, CloudFormation, Pulumi]
- **Containerization & Orchestration:** [e.g., Docker, Kubernetes, Helm]
- **CI/CD & Automation:** [e.g., Jenkins, GitLab CI, GitHub Actions, Ansible]
- **Monitoring & Logging:** [e.g., Prometheus, Grafana, ELK Stack, Datadog]

I am particularly drawn to [Company Name] because of your recent focus on [mention a specific company project or technology, e.g., transitioning to serverless or scaling global edge locations]. I am confident that my background in [specific skill, e.g., Kubernetes cluster management or FinOps] will allow me to make an immediate impact on your infrastructure roadmap.

I look forward to discussing how my technical background in cloud operations can support [Company Name]'s growth and operational excellence.

Sincerely,

[Your Name]
