[Hiring Manager Name]

[Title, e.g., Director of Engineering]

[Company Name]

[Company Address]

**Subject: Application for [Job Title, e.g., Senior DevOps Engineer]**

Dear [Hiring Manager Name],

[Introduction: Mention specific interest in the company's infrastructure or product. Briefly state total years of experience in DevOps/SRE and core philosophy regarding CI/CD and automation.]

**Core Infrastructure & Automation Experience:**

[Highlight a specific project where you built or optimized a pipeline. Quantify results such as "reduced deployment time by X%" or "increased reliability to 99.9%". Mention specific orchestration and IaC tools used.]

Key Stack: [e.g., Kubernetes, Terraform, AWS/Azure/GCP, Ansible]

**Scalability & Monitoring:**

[Describe experience with observability, logging, and incident response. Mention specific implementations of Prometheus, Grafana, or ELK stacks and how you handled high-traffic scenarios.]

**Collaboration & Security (DevSecOps):**

[Discuss experience working with developer teams to shift security left or improve developer experience (DevEx). Mention container security, IAM, or compliance frameworks.]

[Closing: Reiterate alignment with company goals. Express desire for a technical interview to discuss how your architectural skills can support their scaling roadmap.]

Sincerely,

[Full Name]
